Provided that if any such goods are unsuitable for storage or are of a perishable or dangerous nature, or if the Controller considers that unless the goods are sold the proceeds will not be sufficient to cover the full duty and expenses of removal and sale he may direct that they be sold, without notice, in such manner as he may deem fit, as soon as possible after deposit in a customs warehouse.

(3) No goods shall be removed from any customs warehouse without the permission of the proper officer who shall satisfy himself that—

(3) If the balance of the proceeds after making the payments referred to in paragraphs (a), (b) and (c) of subsection (2) is insufficient to make in full the payments referred to in paragraphs (d) and (e) thereof such balance shall be applied pro rata in making such last mentioned payments.

(4) No application under this section for payment of the proceeds or balance of proceeds of sale shall be accepted by the Controller unless submitted to him within six months of the date of such sale.

(5) Where any goods are subject to sale under this section and—

(b) the Controller considers that sale is unlikely to be effected within a reasonable time;
(c) the Controller considers that the goods cannot be sold for a sum sufficient to cover the full duty and expenses of removal and sale; or

(3) A licence issued under this section shall be subject to such conditions as the Controller may impose.

(4) The Controller, without assigning a reason, may refuse to issue a licence under this section, may impose such further conditions to or authorize such exceptions from such licence as he considers necessary, or may revoke (on repayment of the pro rata proportion of any fee paid) or refuse to renew any such licence which has been issued.

(5) An applicant or licensee shall furnish such security as the Controller thinks appropriate for the protection of the revenue and compliance with the customs laws in respect of goods deposited or secured in accordance with any licence issued under this section.

(1) When the Controller revokes or refuses to renew any bonded warehouse licence he shall cause to be served by post on the licensee notice of such revocation or refusal and thereupon such
service shall be deemed to be notice of such revocation or refusal to the owners of all goods warehoused therein.

(2) When any licensee proposes not to renew his licence in relation to any bonded warehouse, he shall cause thirty days notice of such intention to be given to the Controller and to the owners of all goods warehoused therein.

(3) Where the licence in respect of any bonded warehouse has been revoked or has expired, then, within such time as the Controller may direct, all goods warehoused therein shall be entered and delivered in accordance with the provisions of section 47, and where any goods have not been so entered and delivered the proper officer may cause such goods to be taken to a state warehouse and such goods shall thereupon be dealt with in accordance with the provisions of Part V.

(2) The proper officer may at any time take an account of any goods entered for warehousing and such account, or, if no such account has been taken, the entry for warehousing shall, subject to any allowable deficiencies, be the basis upon which the duties in respect of such goods shall be ascertained and paid.

(3) Where any goods entered for warehousing in a bonded warehouse (which are not subsequently entered for the purpose of removal from the warehouse) are not deposited forthwith, or within such time as the proper officer may permit, in the bonded warehouse for which they were entered, the proper officer may cause them to be so deposited at the expense of the licensee of such warehouse and the licensee of such warehouse shall, upon paying such expenses, have a lien on such goods for the cost involved.

(4) Notwithstanding the provisions of this Part the Controller may permit, subject to such conditions as he may impose, any goods or class of goods not liable to duty to be entered for warehousing in a bonded warehouse and may specify the period during which such goods may be so warehoused.

(5) When goods entered for warehousing in a bonded warehouse cease thereafter to be liable to duty by reason of an amendment to the customs laws in relation thereto or for any other lawful reason then, unless the Controller otherwise permits, the owner of such goods shall cause them forthwith to be duly entered and removed from the bonded warehouse.

SCHEDULE

(SECTION 111)

VALUE OF IMPORTED GOODS

1.—(a) The value of any imported goods shall be taken to be the normal price, that is to say, the price which they would fetch at the time when the duty becomes payable, or in the case of warehoused goods, at the time of their entry for warehousing, on a sale in the open market between a buyer and a seller independent of each other.

(b) the normal price of any imported goods shall be determined on the following assumptions—

(i) that the goods are delivered to the buyer at the port or place of introduction into Malawi;

(ii) that the seller bears all costs, charges and expenses incidental to the sale and to the delivery of the goods at the port or place of introduction, which are hence included in the normal price;

(iii) that the buyer bears all duties or taxes applicable in Malawi, which are hence not included in the normal price.

2.—(a) A sale in the open market between a buyer and a seller independent of each other presupposes—

(i) that the price is the sole consideration;

(ii) that the price is not influenced by any commercial, financial or other relationship, whether by contract or otherwise between the seller or any person associated in business with him and the buyer or any person associated in business with him, other than the relationship created by the sale itself;

(iii) that no part of the proceeds of any subsequent resale, other disposal or use of the goods will accrue, either directly or indirectly, to the seller or any person associated in business with him.

(b) Two persons shall be deemed to be associated in business with one another, if, whether directly or indirectly, either of them has an interest in the business or property of the other or both have a common interest in any business or property or some third person has an interest in the business or property of both of them.

3. When the goods to be valued—
(i) are manufactured in accordance with any patented invention or are goods to which any protected design has been applied; or

(ii) are imported under a foreign trade mark; or

(iii) are imported for sale, other disposal or use under a foreign trade mark,

the normal price shall be determined on the assumption that it includes the value of the right to use the patent, design or trade mark in respect of the goods.

4. For the purposes of paragraph 3, the expression “trade mark” includes a trade name and style, and a trade mark shall be treated as a foreign trade mark if it is the mark of—

(i) any person by whom the goods to be valued have been grown, produced, manufactured, offered for sale or otherwise dealt with outside Malawi; or

(ii) any person associated in business with any person referred to in above; or

(iii) any person whose rights in the trade mark are restricted by an agreement with any person referred to in (i) or (ii) above.

5. In order to arrive at the assumed costs, charges and expenses as set out in paragraph 1 (b) (ii), the Controller may accept such deduction from the actual cost of the delivery of the goods to any other place in Malawi as he may consider equitable.

6. When the Controller is satisfied that documentary evidence relating to the clearance of goods through a foreign port of arrival in Africa cannot reasonably be expected to be available at the time of duty payment, he may, at the request of the importer, determine the costs, charges and expenses set out in paragraph 1 (b) (ii) and such determination in any particular case shall not be voided if the actual costs, charges and expenses are subsequently discovered to be greater or lesser.

(b) at any time when there is reasonable ground for believing that the turnover of his taxable goods or taxable services in the current or ensuing period of twelve months will exceed K75,000:

Provided that a person shall not be liable to be registered in accordance with paragraph (a) of this subregulation if, although the value of his taxable goods or taxable services, as the case may be, in a prescribed period of less than twelve months has exceeded the prescribed turnover for that period, the Controller is satisfied that the aggregate value of taxable goods or taxable services in that prescribed period and the remaining period aggregating to twelve months will not exceed K10,000.

(2) A registered person shall cease to be liable to be registered at any time that he satisfies the Controller that the value of his taxable goods or taxable services in the period of twelve months then
beginning will be less than K60,000 and is unlikely to exceed K75,000 in the following period of twelve months.

133. Application for registration

(1) An application for registration under section 110E shall be made in Form No. S.T. 1 and shall be submitted to the Controller within thirty days or the earliest date on which the person liable to be registered knew, or ought with reasonable diligence to have known, that he will be so liable. G.N. 25/1989

(2) Where a registered person enters imported taxable goods for consumption without payment of surtax on the grounds that they are either materials for the manufacture by him of taxable goods or packaging materials for such goods, he shall quote his registered number on the relevant bill of entry or other document and shall make a declaration that the goods are for use by him as materials for the manufacture of taxable goods or packaging materials for such goods, as the case may be.

134. Purchases, etc. by registered persons

(1) If a registered person wishes to purchase or otherwise acquire taxable goods as materials for the manufacture by him of taxable goods or packaging materials for such goods from another registered person without the payment of surtax he shall accompany his order for the goods with a written declaration quoting his registered number and stating that the goods concerned are for use by him as materials for the manufacture of taxable goods or packaging materials for such goods, as the case may be. If such transactions between two registered persons are of a regular nature such declaration may be given in advance to cover all such transactions for a period of not more than one year.

(2) If a registered person, having acquired or imported taxable goods under subregulation (1) or under regulation 133 (2) without the payment of surtax, wishes to dispose of such goods otherwise than as materials for the manufacture by him of taxable goods or for the packaging of taxable goods manufactured by him or to another registered person for such use, he shall make application to the proper officer for permission for such disposal and shall carry out such directions, including the payment of surtax on the goods, as the proper officer may give.

135. Sales, etc. by registered persons

(1) When a registered person sells or otherwise disposes of taxable goods, he shall deliver with the goods an invoice or other document showing—

(a) his own name and address;
(b) the name and address of the person to whom the goods have been disposed of;
(c) the quantity, nature and unit price of the goods;
(d) the total price charged for the goods; and
(e) in the case of a sale or other disposal to another registered person under regulation 134, the number of the certificate of registration of such other person.

(2) The Controller may waive the requirements of subregulation (1) in such cases and subject to such conditions as he thinks fit.

(3) If, after delivery of the document referred to in subregulation (1), a registered person allows a credit or other similar allowance on account of the return of the goods or for any other reason satisfactory to the Controller such registered person may deduct the amount of surtax involved from the amount payable in respect of the month in which the credit or other allowance was given.

(4) If, after the delivery of the document referred to in subregulation (1), any further charge is made for the goods such further charge shall be regarded as a fresh sale and surtax shall be payable accordingly.

136. Records to be kept by registered persons

(1) Every registered person shall keep records to the satisfaction of the Controller showing full particulars of the receipt and disposal by him of taxable goods and of the surtax payable thereon. Such records shall be totalled and ruled off on the last working day of each month or at such other intervals as the Controller may direct and, if required by the Controller, a balance struck.

(2) The Controller may require separate records to be kept of different classes or kinds of taxable goods.

(3) Such records shall be kept at the premises at which the taxable goods concerned are manufactured or stored or at such other place as the Controller may approve and shall be made available for inspection by an officer at any reasonable time.

(4) Declarations given by other registered persons under regulation 134 (1) shall be retained and produced to an officer on demand.

137. Returns

(1) Not later than the twentieth day of each month, or at such other time as the Controller may in any particular case direct, every registered person shall render to the Controller a complete and true return on the prescribed form showing his disposals of taxable goods during the preceding month and of the surtax payable thereon. Such return shall be accompanied by such copies of the records kept under regulation 136 as the Controller may require.

(2) If separate certificates of registration have been issued by the Controller in respect of separate premises used by a manufacturer the Controller may require separate returns to be rendered in respect of such separate premises.

138. Payment of surtax
When rendering the return referred to in regulation 137 (1) the registered person shall remit to the Controller the total amount of surtax shown as payable on such return.

139. Assessment by Controller

If a registered person fails to render the return referred to in regulation 137 (1) within the period required the Controller may, without prejudice to any other action he may take in respect of the failure to render such return, make an assessment of the amount of surtax payable by the registered person for the period in question. Such assessed amount of surtax shall be paid to the Controller by the registered person on demand and shall be presumed to be the correct amount of surtax payable in respect of such period until the contrary is proved.

140. Adjustment of amount of surtax paid

If it is found that the amount of surtax paid by any registered person in respect of any period is incorrect the necessary adjustment shall be made in the next return rendered by the person or in such other manner as the Controller may direct, and such adjustment shall be without prejudice to any other action the Controller may take in respect of the error which gave rise to the adjustment.

141. Exports

Entry of taxable goods for exportation by a registered person shall be effected by the completion and submission to the proper officer of a declaration in the specified form. Such form shall, in addition to the other particulars required, be endorsed with the number of the certificate of registration of the registered person.

142. Drawback

Regulation 117 shall apply to goods exported on drawback of surtax.

143. Cancellation of registration

(1) A registered person shall notify the Controller forthwith upon ceasing to manufacture taxable goods and shall at the same time surrender his certificate of registration to the Controller.

(2) Upon being satisfied that a registered person has ceased to manufacture taxable goods the Controller shall cancel the relative certificate of registration with effect from the date of such cessation and from that date the person shall cease to be a registered person.

(3) If the sales or other disposals of taxable goods by a registered person decline to such an extent that only a small amount of surtax is involved and if the Controller decides in consequence to cancel the registration of that registered person, the Controller shall give the registered person at least 10 days notice of his intention to cancel the registration.
(4) The Controller shall cancel such certificate of registration with effect from the date notified to the registered person under subregulation (3) and from that date the person shall cease to be a registered person, and shall forthwith surrender his certificate of registration to the Controller.

(5) Within 20 days of the effective date of the cancellation of his certificate of registration or within such further period as the Controller may allow the person concerned shall render to the Controller a return on the prescribed form showing—

(a) the amount of surtax payable in respect of his sales or other disposals of taxable goods from the date of his last return until the effective date of cancellation of his certificate of registration;

(b) the amount of surtax represented by the taxable goods of his own manufacture on hand on the effective date of cancellation of his certificate of registration but not sold or otherwise disposed of by that date;

(c) the amount of surtax represented by taxable materials imported or otherwise acquired by him without the payment of surtax for use by him for the manufacture of taxable goods by him or for the packaging of such goods but not so used by the effective date of cancellation of his certificate of registration, and shall, with the return, pay to the Controller the total amount of surtax represented by paragraphs (a), (b) and (c).

(6) If it is found that the amount of surtax paid to the Controller under subregulation (5) does not represent the correct amount payable the adjustment shall be made either by a further payment or by a refund, as the case may be, and if a further payment is due such further payment shall be made by the person to the Controller on demand.

Part 1: Industrial Rebates

1. In this Part, unless inconsistent with the context—G.N. 122/1971, 114/1981

“manufacture” includes to refine, and cognate expressions shall be construed accordingly.

2. Where the expression “Description of Industry” set out in Appendix A to this Schedule includes more than one product the description used shall be deemed to include any or all of the products individually or collectively specified in that Appendix under that heading.

3. A person who wishes to manufacture goods under rebate in an industry specified in Appendix A or Appendix B shall apply to the Controller on Form No. 81 for registration in that industry. G.N. 122/1971

4. An applicant for registration in accordance with paragraph 3 shall supply such information as the Controller may require as to the conduct or proposed conduct of his manufacturing business and no application shall be approved without the consent of the Minister for the time being responsible for trade and industry.

5. A registered manufacturer shall enter into a bond with sufficient surety and for an amount, not being less than K200, to be determined by the Controller.

6. Subject to the provisions of paragraph 10 a registered manufacturer shall not, without the written permission of the Controller or proper officer, sell, use, remove from his factory or dispose of any rebated material except for the purpose for which the rebate was granted:

Provided that—
(i) the Controller or proper officer may allow waste rebated material to be disposed of without payment of duty if he is satisfied that it will not be used, without further manufacture, for the same purpose as material which is not in the form of waste; and

(ii) if the registered manufacturer is permitted or properly required to pay the full duty on any rebated material which thereafter is to be released from the terms of the bond, the registered manufacturer shall enter such material in accordance with the provisions of regulation 26 or regulation 98, as the case may be.

7. A manufacturer may, before or after registration, be required to provide on the premises approved by the Controller for the purpose a properly secured store, adequate for the safe storage of materials on which duty may be rebated, and to provide at his own expense any necessary fastenings so that the store may be locked with a customs lock.

8. A registered manufacturer shall—

(a) when effecting entry on importation; or

(b) on removal from bond; or

(c) on removal from the premises of a licensed excise manufacturer, of materials intended for manufacture under rebate, declare on the relative bill of entry that the goods are to be used solely for the purpose specified.

9. A registered manufacturer shall keep a stock book, in a form approved by the Controller, showing full particulars of all receipts and disposals of materials entered for manufacture under rebate, in such manner that the materials can be readily accounted for to the satisfaction of an officer. If a manufacturer fails to keep a stock book in the manner prescribed in this paragraph, any rebated material received by the registered manufacturer during the period when the stock book was not so kept shall be deemed to have been used for a purpose other than that for which the rebate was granted unless the manufacturer satisfies the Controller that the material was used, transferred or disposed of for the purpose for which the rebate was granted.

10. With the written permission of the proper officer, a registered manufacturer may transfer to another registered manufacturer materials entered under rebate of duty if a declaration of transfer on Form No. 86 is furnished to an officer at the port at which entry of the materials on importation or removal from bond or from the premises of the licensed excise manufacturer was effected.

11. The receipt on the declaration of transfer referred to in paragraph 10 shall be completed by the registered manufacturer to whom the materials have been transferred who shall thereafter assume the obligation in respect of the materials in the transfer and, failing the return of the receipted declaration to the officer within 14 days after the transfer was authorized, the person transferring the materials shall be liable for the duty otherwise payable thereon and shall pay such duty on demand.
12. A registered manufacturer shall, when required by the Controller to do so, carry out under the supervision of an officer, at such times as the Controller may consider necessary, any manufacturing operation in which materials entered under rebate are used.

13. The Controller may at any time cancel the registration of a manufacturer if he is satisfied that such manufacturer is not complying with the conditions of the bond.

14.—(1) At the time of registration and annually thereafter not later than the 1st day of January in each year the manufacturer shall pay to the Controller a fee of K5,000: G.N. 114/1981, 14/2005

Provided that if the manufacturer is registered after the 30th day of June in any year he shall pay a fee of K2,500 in respect of that year.

(3) Where a manufacturer is registered in more than one industry specified in Appendix A or Appendix B the total initial or annual fee shall not exceed the fee referred to in subparagraph (1).

15.—(1) The rates of duty in Part III of the Customs Tariff on goods specified in Appendix A when imported by a registered manufacturer for use in the industry for which he is registered and to which such goods relate, shall be rebated to an extent sufficient to reduce the rate of duty thereon to the rates specified in Appendix A.

(2) The rates of duty in Part III of the Excise Tariff on goods specified in Appendix B when delivered to a registered manufacturer for use in the industry for which he is registered and to which such goods relate, shall be rebated to an extent sufficient to reduce the rates of duty thereon to the rates specified in Appendix B.

Part 2: Industrial Drawbacks

1. In this Part, unless inconsistent with the context—

“manufacture” includes to process and cognate expressions shall be construed accordingly.

2. Where the term “Goods manufactured or processed in Malawi” set out in Appendix C includes more than one product the term shall be deemed to include any or all of the products individually or collectively specified in that Appendix under that heading.

3. Subject to the provisions of this Part, if the goods specified in column 1 of Appendix C are manufactured within Malawi from any of the materials specified in column 2 of that Appendix in relation to those goods, those goods shall, when exported to any country, be subject to a drawback of customs or excise duty paid on such material to the extent shown in column 3 of the Appendix:
Provided that, except in such cases as the Controller may allow, no drawback shall be payable if the goods are exported more than 2 years after the date of payment of the duty.

4. Subject to such exceptions as the Controller may allow, a manufacturer who intends to claim drawback under the provisions of this part shall, before entering materials imported or taken out of bond for the purpose of manufacture in accordance with this Part, register with the Controller his name and address and shall make a note on the face of the relative bill of entry to the effect that the materials or part of them are intended for manufacture and may be exported under drawback.

5. Every registered manufacturer shall keep a stock book, in a form approved by the Controller, showing full particulars of all receipts and disposals of materials entered under paragraph 4 in such manner that the material may be readily accounted for to the satisfaction of an officer.

6. For the purpose of this Part the Controller may, after consultation with the manufacturer, determine the quantity, origin and value of any material or parts and accessories required to be used or consumed in the manufacture of any goods and may authorize drawback in accordance therewith. The quantity, value and origin so determined and authorized shall be presumed, in the absence of evidence to the contrary, to have been used or consumed in the manufacture of such goods.
